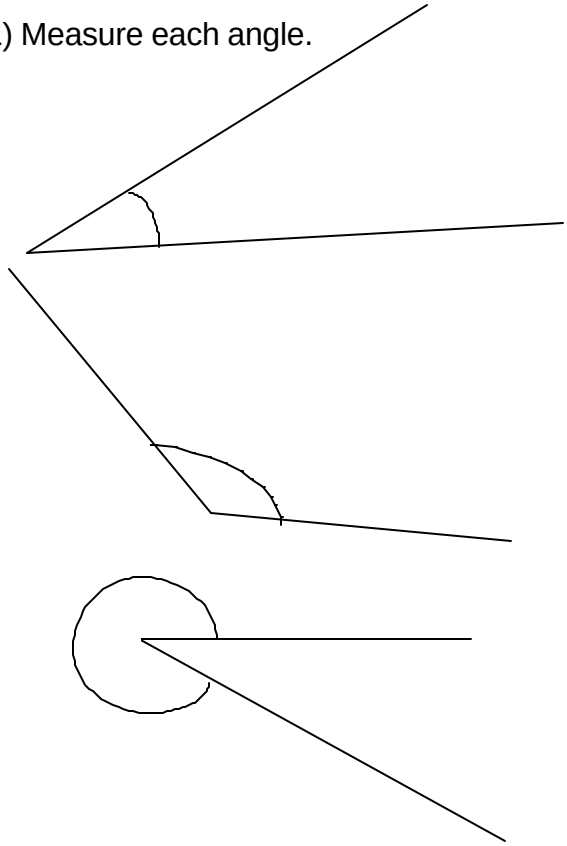
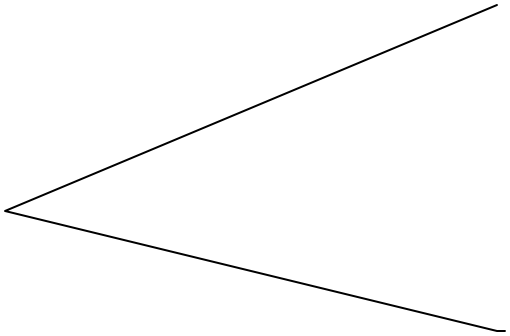
Geometric Instruments

2d (p1) name .....

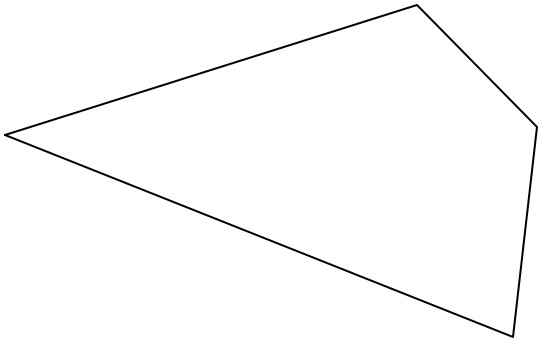
1) Measure each angle.



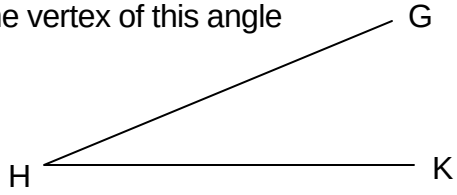
2) Accurately bisect this angle, using a compass, clearly showing all parts of the construction.



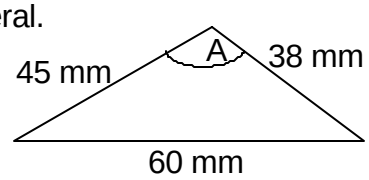
3) Measure all four angles of this quadrilateral. (hint: add up your answers and check the total to see if you have any errors)

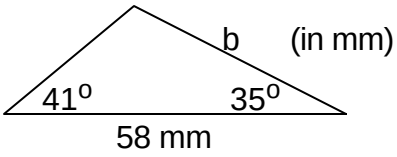


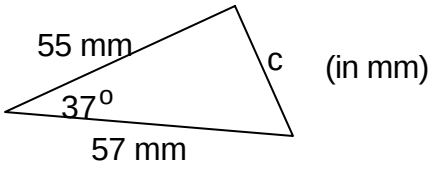
4) name the vertex of this angle



5) Accurately construct each triangle and by measuring, find the value of the pronumeral.







6) PTO
